

Nurses' Nook...Happy Summer!

School is wrapping up and many of you are getting ready to enjoy some outdoor fun and some vacation time with your families if our New England weather decides to cooperate. Students will return to school on September 5th refreshed and ready to go! We have included some links to important documents that will facilitate a safe and smooth return to school:

- If your child needs a physical over the summer here is a link to the [MA physical form](#). Students need a physical within the past 13 months to participate in school sports. Students who are not participating in sports need a physical every 3-4 years. (GR K, 3, 7, 10)
- If your child needed medication in school or for school sponsored activities last year and you anticipate the need for that medication again here is a link to the [medication forms for the district](#). All medications administered in school require a health care provider's order and written parent permission.

In addition could you take the time to please answer this [short survey about our Nurses' Nook articles?](#)

Thank you and have a happy and wonderful summer!

Please feel free to call the nurse in your child's school with any questions.....
