

## **Nurse's Nook** - A Money Saving Tip

This information is important for anyone who has a life threatening allergy or knows anyone with a life threatening allergy:

The **Auvi Q** ( an automated epinephrine injector, which was discontinued by Sanofi in 2015) is being released by a new manufacturer and they are offering a program to make it possible for everyone who needs emergency epinephrine to afford it. Please follow [this link](#) to get information.

In addition here is [a link](#) to a discount coupon on **Epipen** (another brand of automated epinephrine injector).

The nurses at the Freetown Lakeville School District are not endorsing any one brand of automated epinephrine injector over another. We are just letting you know of possible cost savings and thereby encourage both students and adults with life threatening allergies to have a good supply of the medication they might need to save their own life.

If you have any questions please feel free to contact the nurse in your child's school.
