## **FA - FACILITIES DEVELOPMENT GOALS**

The Freetown-Lakeville School Committee (FLRSC) believes that any educational program is influenced greatly by the environment in which it functions. The development of a quality educational program and school facilities that help to implement the program must go hand in hand.

Therefore, it is the FLRSC's goal to provide the facilities needed for the number of students in the District, and to provide the kind of facilities that will best support and accommodate the educational program.

In planning facilities, the FLRSC recognizes that capital outlay funds are limited, and that priorities must be established to make the best use of the school building dollar. The FLRSC's first objective will be to develop a plan that eliminates overcrowding and minimizes the need for extended day programs and double sessions. Whenever possible, the cultural as well as educational needs of the community will be considered in planning facility expansions.

Architects retained by the FLRSC are expected to plan for simplicity of design; sound economics, including low long-range maintenance costs, efficiency in energy needs, low insurance rates; high educational use; security and flexibility.

### Facilities

(1) Every new school which is to be constructed and every addition to an existing school or program for modernization of an existing school shall be designed or planned so as to ensure that the educational opportunities to be offered within that school following its construction or expansion or reconstruction will be available equally to all students thereof without regard to the race, color, sex, religion, sexual and gender orientation or national origin of any such student.

(2) The goal of each school shall be to provide equal numbers of males and females with those facilities and conveniences within a school which are separated for reasons of privacy, e.g. showers, locker rooms, changing rooms, toilets and lavatories. Any school to be constructed shall make such provision and any plan for the expansion or modernization of an existing school shall include whatever provision is necessary in order to achieve compliance with 603 CMR 26.07.

## **FB - FACILITIES PLANNING**

### School Building Committee

The Freetown-Lakeville Regional School Committee (FLRSC), creates a school building committee for specific building projects. This committee acts as the administrative authority for the projects, subject to approval of various actions by the FLRSC.

The school building committee has the following responsibilities:

1. To study and make recommendations to the District with respect to school building needs.
2. To review thoroughly with the Superintendent and the FLRSC the educational requirements in relation to school buildings.
3. To review previous studies and initiate needed studies with or without consultative assistance.
4. To employ the services of architects and cost estimators and such other professional assistance as it may deem necessary.

### Staff Planning

Arrangements will be made by the Superintendent, working through principals, for the school staff to contribute in the planning of new school buildings. Teachers will be given the opportunity to submit suggestions for possible inclusion in the educational specifications.

CMR 2.00

## **FCB - RETIREMENT OF FACILITIES**

When a school building becomes inadequate by virtue of age, condition, size of site, lack of need, or other overriding limitations, and cannot reasonably and economically be brought up to the current educational standards, the building should be considered for a comprehensive closing study. The Superintendent will recommend to the Freetown-Lakeville Regional School Committee (FLRSC) which facilities appear to justify further analysis.

The FLRSC may seek both professional advice and the advice of the community in making its recommendations as to the retirement of any school facility. This will permit the public, which originally acquired the property, to benefit from its recycling or retirement.

A closing study will include direct involvement by those neighborhoods considered in the study and will be concerned with all or some of the following factors:

1. Age and current physical condition of the facilities, its operating systems, and program facilities.
2. Adequacy of site, location, access, surrounding development, traffic patterns, and other environmental conditions.
3. Reassignment of children, including alternative plans according to FLRSC policy.
4. Transportation factors, including numbers of children bussed, time, distance, and safety.
5. Alternative uses of the building.
6. Cost/Savings
  - a. Personnel
  - b. Plant Operation
  - c. Transportation
  - d. Capital Investment
  - e. Alternative Use
7. Continuity of instructional and community programs.

## **FF - NAMING NEW FACILITIES**

Naming a school is an important matter that deserves thoughtful attention. Personal prejudice or favoritism, political pressure, or temporary popularity should not be an influence in choosing a school name. A name with educational significance or inspiration should be chosen. The Freetown-Lakeville Regional School Committee (FLRSC) also feels that it is appropriate to name schools for physical locations; geographical areas; distinguished local, state, and national leaders whose names will lend dignity and stature to the school; or significant or pertinent events.

The Superintendent will prepare for the approval of the FLRSC a procedure to follow in recommending names for school buildings to the school building committee. Whenever possible, the wishes of the community, including parents and students, should be considered in naming new facilities.

It is expected that an orderly, announced procedure will lessen the community or factional pressures that so quickly build up when the selection is delayed or seems uncertain. A prompt decision will reduce disappointments and advance community solidarity. Much confusion in accounts, files, and records can be avoided if a new school can be identified by name before the planning starts.
